8072690392 | sivabava390@gmail.com | linkedin | github | Tamil Nadu

Career Objective

Enthusiastic AI Engineer pursuing Computer Science with specialization in AI & ML, with hands-on experience building intelligent, scalable, and data-driven applications. Developed LegalLens AI — an AI-powered Indian legal awareness platform using React, Node.js, tRPC, MySQL, and Gemini LLM — demonstrating strong expertise in full-stack development, machine learning, Python, SQL, and AI-driven civic tech solutions. Passionate about leveraging artificial intelligence, data analytics, and modern web technologies to solve real-world problems and create impactful digital products.

Education

B.E. Computer Science and Engineering (AI & ML) Rathinam Technical Campus 7.84	2023 – Present Coimbatore
HSC KenBridge Senior Secondary School (CBSE) 66.4%	2022 – 2023 Tirunelveli
SSLC KenBridge Senior Secondary School (CBSE) 100%	2020 – 2021 Tirunelveli

Technical Skills

Languages Python, Java,MySQL	Tools & Libraries Excel, Pandas, NumPy, Matplotlib,PowerBI,Tableau, Claude,Cursor,SQL
Data Analysis Data cleaning, Visualization, Descriptive statistics,Exploratory Data Analysis (EDA)	

Projects

- Legal Lens AI (on progress)**
 - Built a user-friendly full-featured Indian Law Application using HTML, CSS, JavaScript, and Anthropic Claude AI API with(AI Chatbot). The app covers 15+ IPC sections with category browsing, keyword search, bookmarks with using Data pipeline system,RAG,Promot Engineering,Data Analysis
- Store Sales Dashboard – Data Analysis(Mini Project)**
 - Developed an interactive Excel BI dashboard for a Superstore dataset, utilizing Pivot Tables and What-if analysis to identify key profit drivers, resulting in a 15% clearer visualization of quarterly sales trends

Certifications

- Introduction to Data Analytics – Coursera
 - MongoDB - Relational Model (SQL)
- Gen AI -AWS
 - Fundamentals of AI Concepts

Co- Curricular

- Smart India Hackathon 2025**
Blockchain-based Supply Chain
 - Proposed solution leveraging distributed ledger technology for transparency, traceability, and fraud prevention in supply chains
 - Collaborated in a team to design an Agri-Produce blockchain-based supply chain solution, focusing on fraud prevention and data transparency
